

Introduction to Agricultural Management Resources group

Within Dairy One there is a team of people known as the "Agricultural Management Resources group" or "AMR".

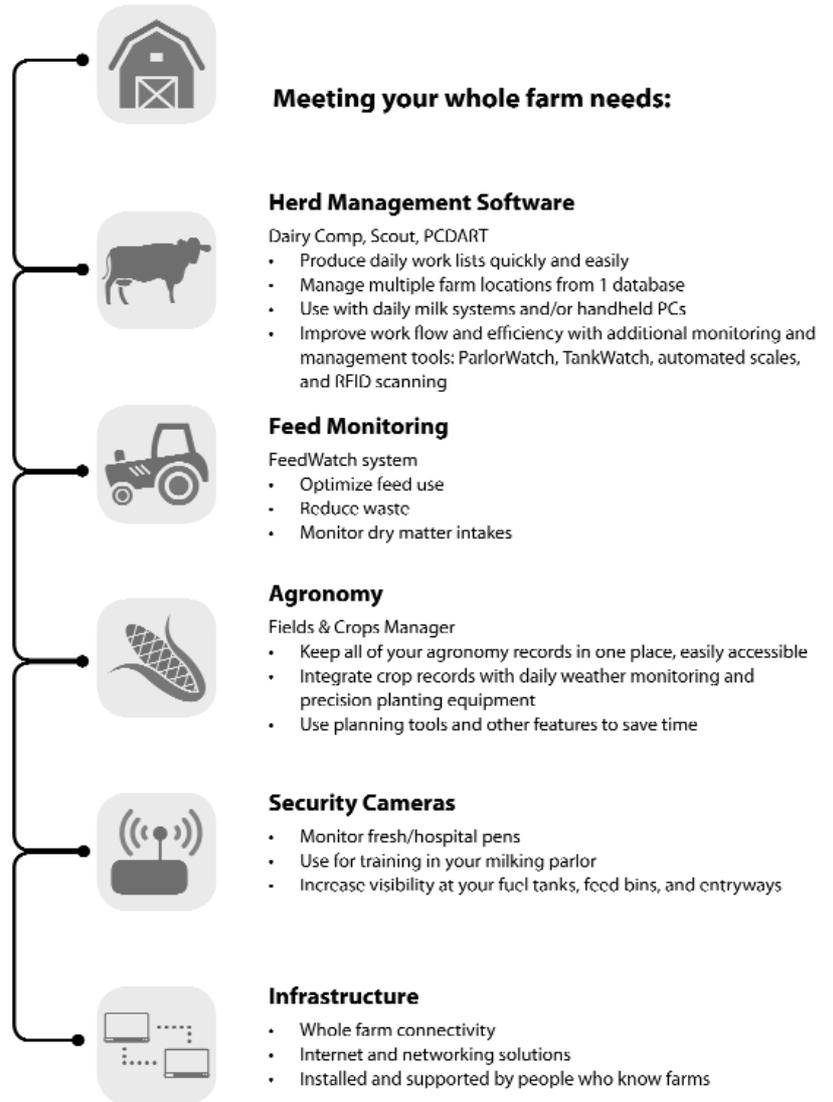

The AMR group travels from Maine to Maryland providing innovative management solutions through installing and supporting hardware and software. Their primary focus is on making technology work, and strengthening the infrastructure of large and medium sized farm businesses. This could mean installing a network on your farm – wired or wireless, installing camera systems for improved monitoring and security, or installing herd management software to help with day to day management decisions.

While we offer a wide range of products and services, it is the support provided by AMR that really sets them apart from any other group found in the US today. No other team can bridge technology with on-farm application like the AMR group, and few have had more experience working with the variety of farms we see here in the Northeast. Each team member brings strengths in hardware, software or both. Many in the group have experience working on or managing large dairy operations. Others have a long history with Dairy One and are experienced in dairy records, data management and using data to make more profitable decisions.

If you have questions or would like more information please contact us at amr@dairyone.com or call 800-344-2697, ext 3.

Agricultural Management Resources

Measurement to Management

Dairy One Cooperative Inc. is an information technology cooperative. We provide DHI records services, herd management software, networking solutions and Analytical services throughout the Northeast and Mid-Atlantic regions of the United States. The Dairy One forage laboratory is recognized as a leader both nationally and internationally for their fast, reliable analysis of feed and forages, as well as soil, water, and manure analyses.

Our mission is to create and deliver data and information that will be used to make profit enhancing decisions for members of the Agricultural community.
