

DAIRY ONE RECOGNIZES OUTSTANDING QUALITY MILK AWARD WINNERS

Each year, Dairy one recognizes those members whose herds have maintained a rolling herd average somatic cell count of 175,000 or less by presenting them with the Outstanding Quality Milk Award.

Winners are presented with a Quality Milk barn sign and a year sticker for the first year that they win the award. Those who have won in previous years are given a year sticker to add to the barn sign, indicating another year of excellence.

Herds with low somatic cell counts (SCC) tend to be more profitable than herds with high SCC. Increased profit comes from reduced mastitis treatment and veterinary costs, higher milk production per cow and milk quality premiums. Additionally, milk with lower somatic cell counts has a longer shelf life and results in a higher yield of cultured dairy products. Herds producing high quality milk with low SCC set a standard of excellence for the entire industry. Careful milking procedures, good milking equipment maintenance, and excellent herd management using individual cow SCC all contribute to a herd's low SCC.

Out of the approximately 6,000 members that Dairy One serves, 501 (406 published) were honored with the Outstanding Quality Milk Award. Dairy One congratulates them and wishes them continued success in 2003.

If you would like assistance improving your milk quality, talk to your Dairy One Records Service Technician or call Dairy One at 800-496-3344.
