

Pasture Management Package

A package designed for use in one pasture during a growing season.

▶ Do you know how your pasture is doing?

Testing your pasture from top to bottom (clippings and soil) will tell you the quality of feed you are providing for your animals. This information will help you better manage pasture for all your animals.

▶ Benefits of using the Pasture Management Package

- Improve ration balancing
- Improve pasture quality
- Improve nutrient cycling

▶ Pasture Management Package Includes:

- **Forage Testing:** You will get three forage testing kits and sample submitting sheets to be used through the grazing season.
- **Soil Testing:** One soil sample to determine the nutrient needs of the pasture (Phosphorus, Potassium, and pH).
- **Interpretation:** Each forage sample result will come with an interpretive sheet. The sheet will have the Dairy One Forage Lab sample ranges for comparison to your results and some management suggestions for changing pasture values.

Price \$75.00

(includes shipping and is a 15% savings over list price.)
