Dairy One Should be the Source for Your Next Computer

Replacing a computer on a dairy farm can seem like a daunting task. Many of the programs used on a regular basis are specialized, some are several years old, and others may have come from a service or equipment dealer that is not around anymore. Then there is the whole question of which computer to buy. Windows 7? Windows 8? How much memory? How big should the hard drive be? When you get past all of this, you face the issue of moving all of the data, documents, and pictures. Just thinking about it can be enough to make most of us want to put it off for a while!

Purchasing a computer from Dairy One can make the process of upgrading your current computer fast and easy. We have been selling and supporting computers for dairy farms for 20 years and are familiar with most of the specialized programs and systems that are in use today. Dairy One computers are built with your business in mind. We begin by talking to you about how you currently use the computer and what you may want to do with the computer in the future. Once we know what you need, we will bring the computer out, move all of your programs, data, files, and pictures over to the new computer. Next, we spend time with you making sure that everything works and that you are able to find it. A typical computer replacement takes 2-4 hours, and results in zero frustration and data loss for you.

Dairy farms run 24 hours a day, seven days a week, and the computer has become an integral part of this. Dairy One computers are custom built to our specifications. We have selected only the components and software that our farmer customers need. The result is a clean, fast, functional computer that will give you great service and do the job that it was intended to do. If there is a problem with the computer, we have a trained team of support people to help you backed by a next day replacement service for all parts.

Don't put off upgrading your computer any longer. Call the Agricultural Management Resources (AMR) group today and find out how easy upgrading your system can be.

Did you know?

You can purchase **Allflex management** and **RFID tags** through Dairy One. RFID tag orders have a file that can automatically download and read into Dairy Comp, making tag management easy. Contact us today to get a quote or place an order!

Visit us at the summer shows!

Come visit with Dairy One and AMR staff at [Empire Farm Days](#) and [Ag Progress Days](#).

Empire Farms Days is August 11-13 and we are located at **booth 452A** in the Dairy Tent, next to DFA.

Ag Progress Days are August 18-20th and we can be found at **booth DLT 1**. Bring your questions, comments and **sign up for a for a \$100 free DHIA service drawing!** Hope to see you there.
