

Dairy One Recognizes Outstanding Quality Milk Award Winners

Each year, Dairy One is pleased to recognize those members whose herds have maintained a rolling herd average somatic cell count of 175,000 or less in the previous calendar year.

Winners are presented with a Quality Milk barn sign and a year sticker for the first year that they win the award. Those who have won in previous years $\frac{1}{2}$ are given a year sticker to add to the barn sign, indicating another year of excellence. Award packets are currently being distributed through Dairy One Farm Service Technicians and Market staff.

Herds with low somatic cell counts (SCC) tend to be more profitable than herds with high SCC. Increased profit comes from reduced mastitis treatment and veterinary costs, higher milk production per cow and milk quality premiums. Additionally, milk with lower somatic cell counts has a longer shelf life and results in a higher yield of cultured dairy products. Herds producing high quality milk with low SCC set a standard of excellence for the entire industry. Careful milking procedures, good milking equipment maintenance, and excellent herd management using individual cow SCC all contribute to a herd's low SCC.

Out of the approximately 4,600 members that process through DRMS Raleigh and get Record Services through Dairy One, 841 were honored with the Outstanding Quality Milk Award. Listed below are those who are on the published option. Dairy One congratulates all winners and wishes them continued success through 2016-2017.

If you would like assistance improving your milk quality, talk to your Dairy One Farm Service Technician or call Dairy One at 800-344-2697.
