Analysis: Pregnancy Johne's BVD **Species:** Cattle Goat Sheep Bison Water buffalo

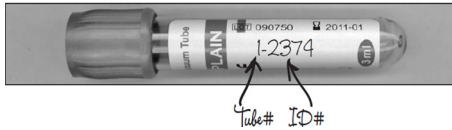

Idexx Johne's Disease testing is not valid for Goats/Sheep in the USA.

Reorder: 12 vials* x _____ Include needles & holder

Direction for submitting blood samples

- Order kits by emailing supply@dairyone.com or check box for re-order. Kits can also be ordered through the online store at www.dairyone.com
- Obtain a blood sample for each animal to be tested in a test tube. Be sure that there is at least 2cc of blood in the correct tube type*.
- Mark the test tube with its vial number and the ID of the animal. Vial number must correspond with the submission form information. Record the ID of the animal in its respective position on the submission form. Record DPB & DPC information

**Send to: Dairy One Animal Health Diagnostic Laboratory
720 Warren Road, Ithaca, New York 14850**

- If using a purchased kit, place up to 6 samples in the large hinged-lid vial provided. Label vials in order.
- Place samples and submission form in a box or envelope for shipping place label on the package and mark the outside with "exempt animal specimen".
- Free shipping for 10 or more samples.
- Optional: use one of our courier's pickup points to have your samples reach the lab quicker; each use is \$7.

By using this form, the customer confirms that they understand the following:

- The laboratory may not notify customer of untestable samples prior to testing other samples in their submission.
- A fee of \$15 may be applied if sample submissions require excessive sample handling and/or directions are not followed.
- Species type, Days Post Breeding, and Days Post Calving information is necessary to determine the suitability of samples for pregnancy testing. By not providing species, DPB, and/or DPC information that conforms to validity criteria, the validity of the test may be affected. Cows must be ≥ 28 DPB & ≥ 60 DPC. Goats must be ≥ 28 DPB. Sheep must be ≥ 35 DPB. Water buffalo must be ≥ 30 DPB & ≥ 60 DPC.
- If a Sampled Date is not provided, the date of the test will be used.
- Simplified test results in the form of a .csv file may be sent to an unsecure digital area.
- The AHDL uses IDEXX Alertys Ruminant Pregnancy for pregnancy testing. The AHDL uses IDEXX MAP (Mycobacterium Avium subspecies Paratuberculosis Antibody) Test for Johne's Disease testing. Dairy One subcontracts BVD testing to CentralStar Cooperative.
- Pregnancy can be tested for the following species: cow, goat, sheep, bison, and water buffalo.
- *Goat and sheep samples must be serum in red-top vials; water buffalo and bison samples must be plasma in purple-top vials. Reorder requests will be filled according to the species indicated by the customer.
- If you have questions or would like more information please email: d1records@dairyone.com | Call: 607-252-7575 | Txt: 607-257-1272
