Submitting samples for manual chemistry analysis:

1. Any combination of tests can be performed with 1.5 ounces of sample. If 1.5 ounces of sample is not available, use the space in each test column to prioritize testing needs (i.e. 1st, 2nd, 3rd, etc.)
2. Clearly label each sample with a sample ID that matches what is written on the submission form.
3. Pack samples securely, include ice packs, and consider using an expedited shipping service.
4. Advanced notice of incoming samples is appreciated.

By using this form, the customer confirms that they understand the following:

- Customer agrees to fulfill payment for testing services indicated; prices are available upon request.
- Samples must be liquid and able to be mixed into a homogenous solution.
- The following methods are used for component analysis:
  Fat (Mojonnier/Ether Extraction, AOAC 21st ed. 989.05)
  True/Total/Casein Protein (Kjeldahl AOAC 21st ed. 991.22/991.20/998.06)
  Total Solids (Convection AOAC 21st ed. 990.20)
  Titratable Acidity (Titrimetric AOAC 21st ed. 947.05)
  Lactose (By Difference; calculation requires results for fat, total solids, ash, & true/total protein)
- True & Casein Protein analyses cannot be performed on samples more viscous than regular milk.
- Unless otherwise stated, Check Mark assumes the analysis is single, sample type is milk, and the shipper does not need to be returned. Customer agrees to pay excess fees for missing or incorrect sample information. The fee for returning customer's shipper is the postage required.
- For prices or questions about analysis, contact checkmark@dairyone.com
