

Sample Handling Fee *Service (17)*

Dairy One serves a wide variety of clientele from across the globe. This includes producers, agri-service representatives, consultants, veterinarians, universities, wildlife parks and major agricultural corporations. This results in a diverse nature of samples that can require additional handling and prep work to ready a sample for analysis. Your typical sample size should be as follows:

<u>Sample type</u>	<u>1 quart sample bag</u>	
	<u>grams</u>	<u>ounces</u>
Hay	100	3.5
Haylage	300	11
Corn Silage	450	16
Grain/Grain byproducts	450	16
Total Mixed Rations	400	14

Any samples that exceed these sizes may be subject to the handling fee. This fee will be applied at our discretion and without notice. Other potential candidates include, but are not limited to:

- gallon size bags of long stem hay
- flakes of hay
- intact whole plants, e.g., stalks of corn, sorghum sudan, small grains, etc.
- whole ears of corn
- molasses blocks
- mineral blocks
- fat based products, e.g. suet cakes
- bones/antlers
- lab animals
- fish

Also included are requests to process the entire sample. Depending upon sample size and moisture, this may add 1 – 2 days to turnaround time.

This list is non-exhaustive. Please contact us prior to sending your samples if you have any questions.
